

# Multi-factor authentication (MFA) and the Mainframe

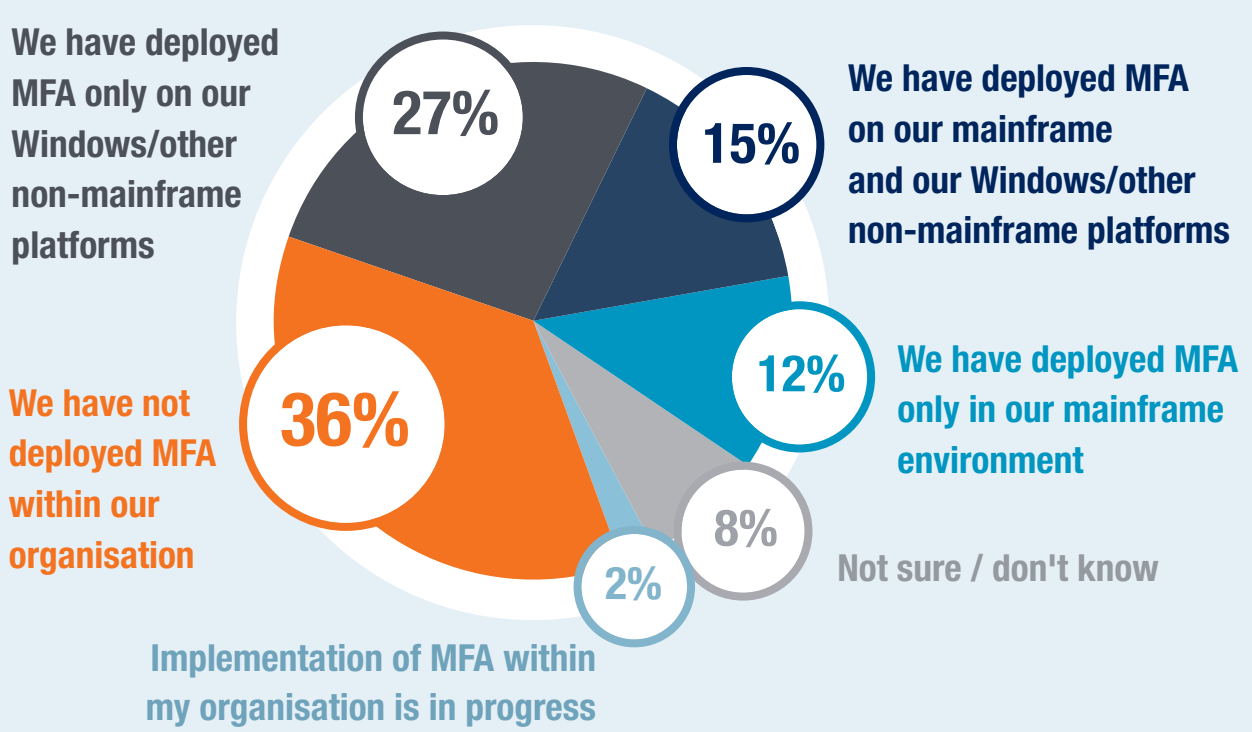

A survey of mainframe professionals by Macro 4

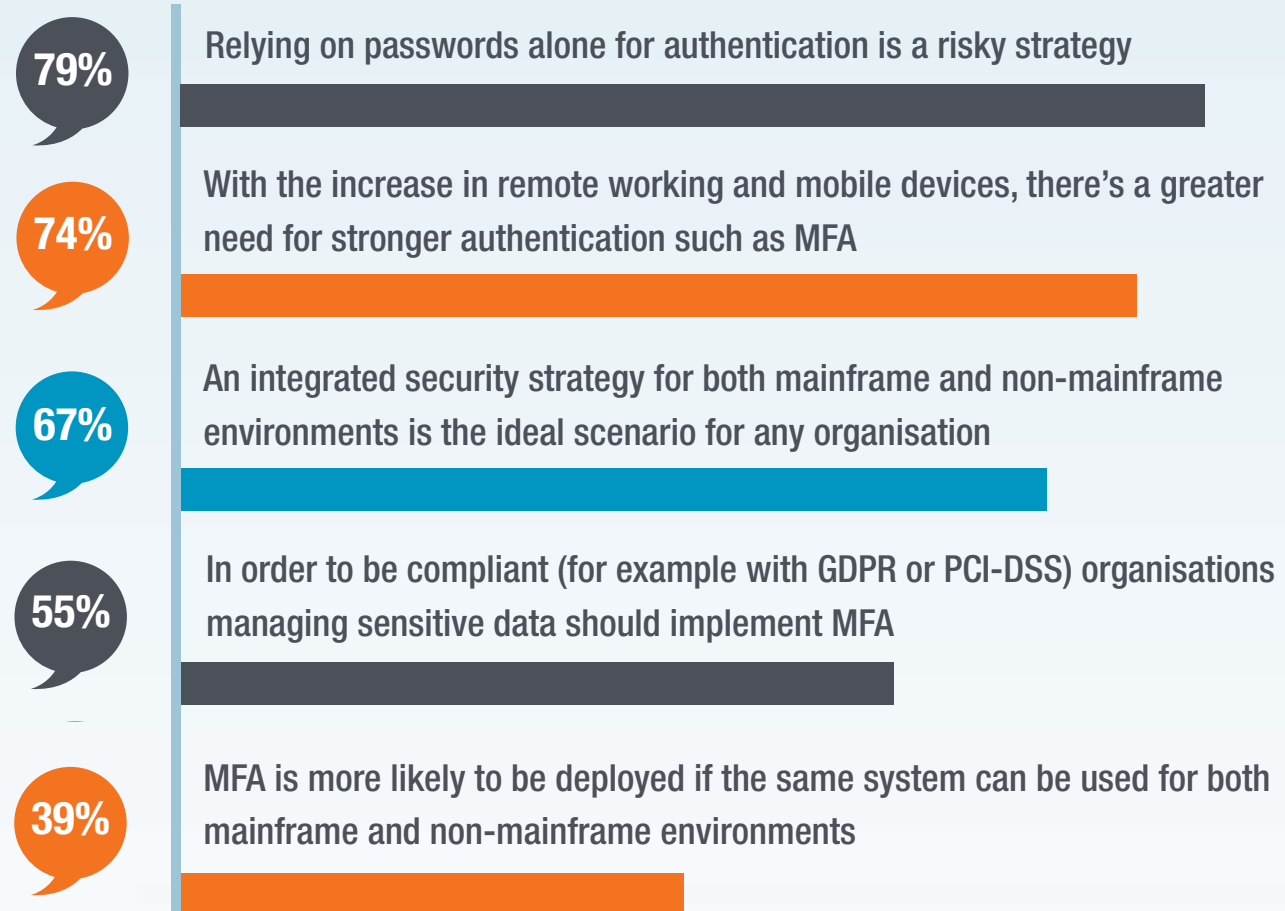

## Q What are the disadvantages of having separate authentication systems for mainframe and non-mainframe applications?

## Q What is your organisation's approach to adopting multi-factor authentication (MFA)?

## Q Which of the following statements do you agree with?

To find out more about Macro 4's solutions for improving mainframe security with MFA, contact [market@macro4.com](mailto:market@macro4.com) or visit [www.macro4.com/mfa](http://www.macro4.com/mfa)
